WESTERN PLASTICS

LLDPE Pallet Stretch Films

January 4, 2016

Dear valued customers:

Based on the information provided by our raw material suppliers, we are glad to let you know that none of our current stretch film products contain any of components in the Reach candidate list of substances of very high concern (SVHC), or substances proposed to be listed.

REACH (the European Union regulation for Registration, Evaluation, Authorization and Restriction of Chemicals) was revised again on June 15, 2015 to include additional Substances of Very High Concern (SVHC), which now totals 163.
The list of 163 Substances of Very High Concern (SVHC) can be found in the following web site:
http://echa.europa.eu/candidate-list-table

To the best of our knowledge, none of these materials are generated during the extrusion process.
Because we do not expect these materials to be present, we do not run any analysis on our raw materials or our finished products to measure for these materials.
I hope that this information meets your needs. If you have any further questions, please contact us directly.

Sincerely Yours,

Shane Starkey
