

April 6, 2016

Dear Valued Customer:

Our resin suppliers have informed AEP that due to an increase in global polyethylene demand as well as recovering energy costs they will implement a polyethylene price increase effective April 1st.

Based on the April 1st PE resin movement AEP Stretch Film will implement a 5% increase for all grades of film effective with all orders placed on or after May 2nd, 2016. This is in addition to the previously implemented increase of April 4th and all orders must call for immediate delivery.

Due to tight resin availability AEP will strictly limit our customer's orders for the next 30 days to a quantity equal to one month of their average historical six months purchases. Your AEP Sales Representative will inform you of your average purchases over the preceding six months. In addition, we reserve the right to accept or decline orders for any reason.

AEP Stretch Film values the relationship with each of our customers. We are working diligently to limit the exposure of a volatile resin market and its impact on our mutual business. We will continue to communicate changes within the market as they evolve.

Thank you for your business and continued support of AEP Stretch Film.

Best regards,

Brian Ochsner
Vice President
AEP Stretch Film
