

June 18, 2009

Dear Valued Customer:

Due to increasing export demand, favorable currency exchange, and increasing energy and feedstock costs our resin suppliers have implemented an increase effective June 1st. In addition, our suppliers have announced an additional increase for July 1st that we will monitor closely.

Therefore, AEP Stretch Film will be implementing a 5% increase on conventional grades and a 6% increase on our premium grades effective with all orders placed on or after July 13, 2009. Premium grade films are identified as XR, XRP, XH, XB, EXRW, ADE, ADR, LFOX, Pro5e and Xtreme.

Due to recent heavy purchasing prior to our June 8th increase and consequent longer lead times, AEP will be strictly limiting our customer's orders to a quantity equal to one month of their average historical six months orders. In addition, we reserve the right to accept or decline orders for any reason.

AEP Stretch Film values the relationship with each of our customers. We are working diligently to limit the exposure of a volatile resin market and its impact on our mutual business. We will continue to communicate changes within the market as they evolve.

Thank you for your business and continued support of AEP Stretch Film.

Best regards,
