

# WrapNet

## SOFT KNITTED PALLET NETTING

### SPECIFICATIONS

**Material:**  
High density polyethylene

**Roll Size:**  
STANDARD MACHINE rolls - 20" & 30" x 10,000'  
STANDARD HAND rolls - 20" & 30" x 1,000'  
(Extended Core)  
STANDARD HAND rolls - 20" & 30" x 3,000'

**Panel Strength:**  
STANDARD - 140 pounds

**Roll Diameter:**  
STANDARD machine rolls - approximately 10"

**Core:**  
All machine rolls on 3" I.D. Core

**Pallets (shipping units):**  
Machine Rolls - 32 rolls per pallet  
Hand Rolls - 50 cases per pallet

### ADVANTAGES

#### Economical

WrapNet is a cost effective way to unitize pallets when ventilation is required. Designed to be used on conventional spiral wrapping machines with no alterations necessary.

#### Low Labor Cost

It's easier and faster to apply than conventional strapping resulting in lower material and labor costs

#### Recyclable

The netting is 100% High Density Polyethylene. and can be recycled or easily compacted for efficient disposability.

#### Discourage Pilferage

A pallet wrapped in netting discourages unauthorized sampling and "mysterious" disappearances.

# WHO? WHAT? WHY? WHERE?

## What is Pallet WrapNet?

WrapNet is a light weight knitted netting. The primary use of WrapNet is for stabilizing unitized pallets.

## Why is Pallet WrapNet Used?

The common denominator for all uses of WrapNet is the need for the palletized goods to "breathe". Palletizing fresh fruits and vegetables is the primary use of WrapNet, but there are growth areas in other niche markets that can mean increased sales and new accounts.

## WrapNet Solves Problems

If condensation formation on the inside of stretch film is a problem, the use of WrapNet is an efficient, cost effective method of alleviating the problem. If goods require a well ventilated area to cure or cool down, WrapNet is the solution.

### **Problem**

Products are boxed and palletized when still warm. Condensation forms on the inside of the cling film and deteriorates the boxes.

### **Solution**

Place pallets in cool down/holding area for 24 to 36 hours, or wrap the pallets in WrapNet and eliminate the time and expense of the holding area.

### **Problem**

A product has excessive moisture when produced and has to "cure" prior to being stretch wrapped.

### **Solution**

Wrap the pallet in WrapNet and let the curing take place in transit.

These are two actual examples where innovative packaging distributors solved their customers problems. This resulted in increased sales, loyal customers and the satisfaction of a job well done.

**"Quality Assurance** - Western Plastics is committed to providing the highest quality pallet netting available in the market."

## Hand Held WrapNet

Comes complete and ready to use, hand held WrapNet comes on lightweight disposable core handles for easy application.

## Which Equipment Will WrapNet Work On?

Machine WrapNet has a standard 3" I.D. core and is designed to fit on conventional spiral wrapping machines, If the machine can exert tension on the core or the net, it will likely work with no alterations, meaning immediate application for your customers and sales for you.

## Who Sells WrapNet?

WrapNet is sold only through distributors that offer products such as spiral wrapping equipment, stretch films and tapes. Numerous distributors have had a great deal of success solving their customers pallet wrapping problems by being innovative in the application of WrapNet. That builds customer confidence and repeat business.

## What are the Advantages of WrapNet Over Other Brands?

WrapNet is the highest quality netting available in the market. The netting is precisely metered to a full 10,000' roll, ensuring full value for the product. The core used is of the highest quality in the industry safeguarding against core failure. Western Plastics stands behind every roll 100%. In short, you can rely on Western Plastics Pallet Wrap to perform for you. Experience peace of mind knowing your customer is receiving a quality product.
