VENTED WRAP

Available in the following sizes:

- 17" X 1,000' on Extended Core
- 17" X 3,000' on 3" Core Bulk Pack
- 17" X 8,400' Machine Grade

Premium (Guaranteed 250%)

- 19" X 3,300' Premium Machine Grade
- 29" X 3,300' Premium Machine Grade

Air-Flow™ Lite (Guaranteed 175%)

- 19" X 2,800' Air-Flow™ Lite 175

SAMPLES AVAILABLE

Air-Flow™ pallet wrap, an amazing stretch film with die cut holes for ventilation. Air-Flow™ reduces spoilage that conventional stretch film can cause, by eliminating condensation build up on the inside of the pallet wrap. Air-Flow™ combines the advantages of stretch netting with the performance of LLDPE pallet wrap. Air-Flow™ is available in machine length rolls, and hand wrap rolls for manual application. End users include the agriculture/produce, packing and shipping industries. Also dairy, beverage, and frozen food industries.

LET YOUR PRODUCTS BREATHE

Overview: Air-Flow™ pallet wrap is a stretch film with die cut holes for ventilation. Air-Flow™ is a proven alternative that services the agricultural, industrial and manufacturing industries. Air-Flow™ comes in two die cut variations: Air-Flow™ standard film and Air-Flow™ Premium. Air-Flow™ meets industry challenges.

Condensation: Air-Flow™ permits condensation to leave the pallet, thus protecting the packaged goods and other packaging materials (labels, printed display cartons).

Even Cooling: Die cut holes allows products to cool evenly and remain the same temperature throughout the pallet. Vent holes allow the product to cool faster which reduces cooling costs.

Reduce Spoilage: Regular stretch film blocks cool air from entering the pallet and keeps humidity from escaping. Internal build up contributes to spoilage during storage and transit.

Waste Reduction: The unique design, recyclability and film weight of Air-Flow™ establishes it as a viable source reduction solver. Air-flow™ is 100% recyclable and requires less land fill space.

Labor Savings: Works on conventional stretch wrapper machines. Quick and easy way to start wrapping. Does not have to be tied off and only requires one person to apply.

Forklift Friendly: Air-Flow™ does not tangle in forklift wheels. Once cut from the pallet, the sticky properties keeps it waded into a ball and out of the forklifts wheels.

Less Wear: Netting tends to tangle in the wrapper's rollers. Air-flow™ dispenses freely, does not fray or tangles in the rollers.

Freezer Film: Air-Flow™ does not have a flash freeze breaking point. Due to its chemical composition, it will hold up in all cold storage and freezing applications.
